Watch on hum X

ethersmasterpiece.com has a very low trust score. Why?

We scanned ethersmasterpiece.com for several indicators and we think the website may be a scam. Exercise extreme caution when using this website.

Scamadviser reviews each website automatically for 40 different elements like who owns the website, are the contact details hidden, where is the website hosted, what is the technology being used, and much, much more. Based on all the information gathered, we create a trust score.

ethersmasterpiece.com has a very low trust score according to our algorithm. However, computers may be wrong. The website has a strong indicator of being a scam but might be safe to use. We recommend you check the website using our [check list](#) or by contacting the company directly.

Positive highlights

- ✓ We found several positive reviews for this site

Negative highlights

Company Evaluation

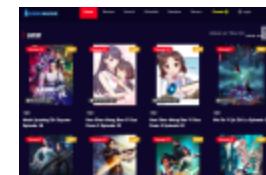

The owner of the website is hiding his identity. Spammers use this information to promote services to website owners. Some website owners therefore chose to hide their contact details. However, it can also be misused by scammers. Our algorithm gives a high rating if the identity of the website owner is shown.

Webshop Evaluation

In our Analysis we always check the Tranco ranking. In this case it was low. A low Tranco ranking means that the website has relatively few visitors. For a new website this is logical. The same is true for a highly specialized website. However if the website claims to be a large corporate or popular site, than warning flags should be raised.

Legit websites often reside on servers with many other safe websites. In this case however we identified several unreliable websites hosted on the same server as the website. This may be a negative signal and as a result we lowered the review of ether masterpiece.com. To see which other websites are hosted on the same server, please check the "Server" tab lower on this page.

checking website offering crypto-related services before you invest or use their services. Check [How to check if a cryptocurrency site is legit or a scam](#). to learn more.

This domain name has only been registered recently. This means that the website is actually quite young and few if any consumers have had time to leave reviews or social media comments. It is therefore best to check this website thoroughly to make sure the website was not set-up by a scammer. Please check out our article "[How to recognize a scam](#)".

NFTs are excellent for diversifying digital assets, but like most business initiatives, they have particular dangers that must be taken into consideration. One of these hazards is the price and ownership volatility, which allows the selling of many phony NFTs at a significant loss to the purchasers. There is also the problem that many nations' federal laws do not yet recognize NFT trading; as a result, it is possible for unwary consumers to fall into money laundering traps and face prosecution as a result. When trading NFTs, we strongly encourage you to exercise great caution.

Technical Evaluation

We always check which other websites are registered by the same company the website is using. In this case we discovered that the registrar is facilitating a high number of websites that have a low to very low review score. This may be a coincidence but it may also be caused by lax "Know your customer" processes at the domain registration bureau. The trust score of the website has been reduced.

We found a valid SSL Certificate. An SSL certificate is used to secure communication between your computer and the website. There are different levels of SSL certification. A free one is also available and this one is used by online scammers. Still, not having an SSL certificate is worse than having one, especially if you have to enter your contact details.
